SUMMARY

A User Interface (UI) Developer with 10+ years of experience, specializing in Agile methodology, project management, application development, and UX design. A strong history of building and leading diverse technical teams to create scalable code and web solutions. Adept at managing stakeholder expectations throughout all phases of the project lifecycle.

EXPERIENCE

OCTOBER 2012 TO PRESENT

UI/UX DESIGNER & FRONT-END DEVELOPER

ABC DESIGNS, ANDHERI (W)

Working as UI/UX Designer & Front-End Developer my role is translate user requirements into scalable code, develop prototypes, conduct wireframing activities, and ensure alignment with client business specifications. Perform testing on web pages, analyze user feedback, and coordinate with cross-functional teams to identify opportunities to enhance web page responsiveness.

Created custom front-end frameworks for marketing, advertising, and e-commerce websites, platforms, and applications, which included managing all aspects of prototyping, wireframing, debugging, and coding activities. Developed innovative features in coordination with stakeholders, technical teams, and the product management organization to improve user satisfaction.

- Leading UI/UX and designing projects from concept to production.
- Utilizing a systematic UI/UX Design process that ensures a high-level of success for each project delivered.
- Working with and communicating with Product Owners, Project Coordinators/Business Analyst, gathering clear business requirements and delivering designs on time.
- Generating wireframes, interactive prototypes and hi-fidelity visual UI design mockups (XD, Photoshop).
- Expert at hand coding clean HTML and advanced CSS to Web standards.
- Creating cross-browser compatible and standards-compliant CSS-based page layouts.
- Involved in fixing Front-End issues with the layouts.
- Managed front end aspect including design and first concept page layout plans.
- Write high-quality code to ensure that the web page is compatible with all kinds of mainstream browsers, and debug the compatibility.
- Actively involved in requirement gathering from client and end-users to develop a layout plan.
- Consultation - Recommending Solutions and technologies based on client's project and budget.
- Visual designs for websites, logos, banners, e-newsletters, branding.
- User Experience Design, Usability, Web Accessibility.

Performed front-end development for interactive web designs to improve functionality and user experience using HTML, CSS, Bootstrap, Saas, JavaScript and jQuery. Every single visual design task, either for a website or Mobile, challenges me to do distinct, user friendly, modern and stay aligned to the user experience phenomenon.
